I figured I was the last to know. I'm wrong again. I think I saw an email from Bruce on the FOIA.

Thanks. It looks like 13 facilities.

I think Region 8 is the lead for an NPR FOIA. This file along with the others we traded should answer their first question of how many Subpart E facilities are permitted. Are you sending them these lists?

Elaine,

I believe this is the latest and greatest list we have. We were working on getting some of those SIC codes changed for a few of those you had listed below. If you have questions please feel free to call me.

Andrew

Another clarification question: how many individual permits exist for traditional oil and gas vs. coal bed methane in CO? A quick pull in our system under SIC Code 1311 identified about 25 (below) (though not sure how many of those are traditional oil and gas vs. CBM). Is this accurate?

Elaine,

A copy of our General Permit for Produced Water is available on our website. I have attached a couple of certifications that show how it has been applied for both a larger scale treatment facility and a small single oil well facility.

Additionally, here are copies of permits for Iles Dome (larger scale oil operation) and XTO (CBM permit in the raton basin).
